I am a Frontend developer with a strong sense of ownership that drives me to go above and beyond in every project. My goal is to ensure that every detail of the product backlog leads to outstanding sprint results. Over 3 years of experience as a frontend developer, coupled with strong background in data-driven UI/UX design, allows me to consistently use best practices and the latest technologies to elevate standards in web accessibility and usability. I am comfortable with most frontend frameworks and testing technologies which leads me to deliver high-quality solutions that consistently meet project goals. I have worked with different backend technologies and am capable of working with various APIs. I am particularly proud of being a team player who collaborates effectively with cross-functional teams, appreciates knowledge sharing, and values continuous growth for all team members. My technical and soft skills enable me to add value from day one to the team.

Experience

Frontend Developer

Iran-Diba Teb Jame

Oct 2021- Apr 2024

- Significantly improved rendering speed by 30% through the composition of CSR and SSR.
- Collaborated closely with a dynamic Scrum team of 9 members to conceptualize, design, and develop a cutting-edge dashboard, providing users with real-time data insights based on their activity.
- Implemented OAuth authentication services to enhance application security and usability.
- Contributed to the successfully establishing CI/CD Pipeline using AWS CodePipeline.
- Developed modular, responsive templates using UI library.
- Managed an effective code review process and maintained descriptive Git commits while handling version control on GitHub.
- Mentored and supervised a team of 3 junior members, focusing on Figma and React.js development.

Frontend Developer

Iran-Dadevarzan

Apr 2020 - Mar 2021

- Developing and maintaining a web application connecting with React.js, Redux, and Sass.
- Doing user research, and providing user journey maps and user personas.
- Creating interactive prototypes based on user journey.
- Adept at translating project requirements and prototypes into fully functional

and visually appealing features.

Graphic Web Designer

Iran-Websima DMCC

Mar 2016 - Feb 2020

- Championed web accessibility standards and employed essential design principles, such as visual hierarchy, color theory, layout, and typography, to ensure inclusivity and compliance, resulting in the creation of intuitive and engaging web application interfaces that are accessible to all users.
- Utilized a variety of software tools, including Figma, and Adobe Creative Suite (Photoshop, Illustrator) for graphic and web design. Proficient in HTML for structuring web content and CSS for content formatting.
- Collaborated closely with a Scrum team consisting of two web developers and a Project Manager to bring design concepts and new features to life, ensuring alignment with technical requirements.
- Designed and developed user-friendly and visually appealing websites with a focus on pixel perfect design, seamless user experiences, and adherence to industry standards.
- Continuously updated and adapted websites to reflect modern design trends while maintaining the brand identity.

Voluntary Work

Web Developer

Mehr Afarin Charity

<https://www.mehrafarinorg.com/>

May 2020 – Apr 2022
